PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building full-stack web applications and machine learning pipelines. Skilled in Python, JavaScript, and the MERN stack, with a track record of delivering measurable performance improvements in hackathon and independent projects. Seeking a software engineering internship/entry-level role to apply strong problem-solving and cross-functional collaboration skills.

EDUCATION

B.Tech in Computer Science Engineering — ITER, Siksha 'O' Anusandhan University, Bhubaneswar

Expected Graduation: 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Web Development, DBMS

Class XII (CBSE) — Delhi Public School, Ranchi, Jharkhand — 86.5%

Class X (ICSE) — Sacred Heart School, Ranchi, Jharkhand — 93.8%

PROJECTS

GigShield — AI-Powered Gig Worker Insurance & Fraud Detection Platform | DEVTrails 2026 Hackathon (Team of 5) | Jan 2026 – Mar 2026

- **Engineered** a fraud detection pipeline using Isolation Forest (scikit-learn), achieving ~85% accuracy in identifying anomalous gig-worker activity and GPS spoofing patterns
- **Developed** and integrated RESTful backend APIs using Python/FastAPI, reducing fraud confidence score latency by ~40% through optimized query handling
- **Collaborated** within a cross-functional 5-member team, contributing ~60% of the ML pipeline codebase and coordinating seamless frontend-backend integration

CloudVault — Cloud Storage Web Application | Individual Project | Jan 2026 – Apr 2026

- **Built** a full-stack cloud storage platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), enabling secure file upload, organization, and sharing with role-based access control
- **Implemented** JWT-based authentication and RESTful APIs with Express.js and Node.js, supporting file upload/download, folder management, and real-time storage quota tracking via MongoDB Atlas
- **Designed** a responsive React.js frontend with drag-and-drop upload and search/filter functionality, and deployed the application (backend on Render, frontend on Vercel) for public access

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python
- **Web Technologies:** HTML5, CSS3, JavaScript, Responsive Design
- **Frameworks & Tools:** React.js, Node.js, Express.js, Flask, FastAPI, GitHub, scikit-learn
- **Database:** MongoDB, PostgreSQL, DBMS Concepts, Basic SQL
- **Core Concepts:** Data Structures & Algorithms, OOP, Debugging, Problem Solving
- **Project & Workflow Tools:** Agile/Scrum methodology, Jira, Git version control

CERTIFICATIONS

- **Frontend Development Certification** — Infosys Springboard (2026): Covered HTML5, CSS3, JavaScript (ES6+), React.js fundamentals, responsive design principles, and web accessibility standards

EXTRACURRICULARS & INTERESTS

- **Classical Dance – Kathak:** Trained Kathak dancer; performed at university cultural events, developing discipline, stage presence, and creative expression
- **Fashion & Design Trends:** Keen interest in global fashion trends and design aesthetics, informing a strong eye for UI/UX and visual design in software projects
- **Formula 1 Enthusiast:** Avid follower of Formula 1, drawn to the intersection of engineering innovation, real-time data analytics, and high-performance strategy
- **Languages:** English, Hindi, Bengali
